- Field data operator within the ASCEND Project – capacity building associations of persons with disabilities in Central and Eastern Europe, for the application of research data collection tools, between 15 July and 15 September 2022, under the supervision of the basic project team (project coordinator, research leader, training leader). The purpose of the study is to identify the barriers with which are faced by young people with disabilities (aged 16-35 years) in the fields of education, social support and employment. By understanding the factors that contribute to these barriers, researchers hope to contribute to improving the situation of young people with disabilities in Romania. The ASCEND project is implemented by the NDRC (National Council of Disabilities in Romania) and RENINCO (National Information Network and Cooperation for the Integration into the Community of Children and Young People with Special Educational Needs), with the support of EDF (European Disability Forum), and financial support from Citi Foundation.
